Dedication

I dedicate this dissertation to my wife, Thanuja, who gave more than her share when I am studying for Master of Science. She has accompanied me with her love, unlimited patience, understanding and encouragement. Without her support, I would never be able to accomplish this work. On this period, she played dedication role of excellent mother with my baby daughter and son with my minimum help.

Acknowledgement

First of all, I would like to express my sincere appreciation to my supervisor Dr. Prasad Wimalaratne for providing me an opportunity to work with him and for his guidance, encouragement, continual guidance and simulating discussion on all aspects concerning this project. I would like to give my heartfelt appreciation to my teachers, who gave their knowledge at the Faculty of IT, University of Moratuwa. I'd like to thank to the coordinators of the MSc course and staff of the University of Moratuwa who gave their maximum support to me. Then I must give many thanks to my all colleagues especially Chatura Jayamuni and Sudheesha Karunarathna for their very helpful insights. Additionally, I would like to acknowledge Chinthka Jayasekera who is my roommate of the office, for always giving his excellent, invaluable support and suggestions throughout this process without any hesitation. Finally, I'd like to thank all staff of the Department of Computer Science, Faculty of Science, University of Ruhuna for share my office workload with understanding my dedication to this project.

Abstract

University is a place where vast varieties of people gather and interact with each other. University consists with major community categories such as students, academics and non-academics. Students are the majority of the university community. Diversified set of notices can be seen everywhere in Sri Lankan university premises. Several types of notices can be seen such as posters, notices on boards, hand bills, banner and cutouts. Most of these are published by students. But effectiveness and efficiency of these types of notices are very low. It is a time & resources wasting process also. On the other hand existing mechanisms are not fit for required vital information delivery on focusing to target audience. Students are needed more effective and efficient communication system with emergency alerts service and live monitoring mechanism at rush of common places remotely. Most of the time student representatives and administrative officers need to keep track about notices they have published for further reference.

Internet and web is the world most popular tools in ICT. All local universities have been established own website and most of the time established societies in the university maintaining their own web site or a page within main university web site. But faculty level student union or university student union does not engage with web. Traditional web site, email applications or discussion forums will not fulfill this students' community communication requirement.

By introducing a new web portal dedicated for students' community communication can be done in effective and efficient manner. Existing computer network infrastructure, tools, technologies and resource person in the University can be use to develop new communication and information system with effectively and efficient manner for University community based on students' needs. This web portal integrates with content management system, emergency alert service, live monitoring and much more. Users perform as visitors, authors, editors, publishers or super administrators within their privileges. Subscribers of the system can be access restricted information which is not published to general public. It is included with customization ability and localization as user desired. Those features are implemented by server applications, DBMS, CMS, SMS gateway and much more tools.

The evaluation revealed new system is operating in acceptable level to users'. But it is clearly point out interfaces and functionalities should be significantly improved.

Table of Contents

	Page
Chapter 1 - Introduction	1
1.1. Chapter Overview	1
1.2. Motivation	1
1.3. Aims & Objectives.....	3
1.4. University Student Community Communication Portal (USCCP)	5
1.5. Structure of the Dissertation	6
Chapter 2 - Commuality Communication Methods in the University of Ruhuna.....	7
2.1. Chapter Overview	7
2.2. Consideration for Students Centered Communication	7
2.3. Major Problems in Current System	8
2.4. Comparison of the Features of Existing Communication Methods.....	11
2.5. Why Need a New System?.....	12
2.6. Chapter Summary	13
Chapter 3 – Technologies on Community Communication	14
3.1. Chapter Overview	14
3.2. Free and Open Source Software	14
3.3. Three – Tier Architecture.....	14
3.4. The Internet and the WWW	15
3.5. Web Portal Technology	17
3.6. HTML, CCS, XML and PHP	17
3.7. DBMS	19
3.8. Web Development Software Bundle	19
3.9. Content Management Systems (CMS).....	19
3.10. Mobile Phone and SMS Gateway	20
3.11. Chapter Summary	22

Chapter 4 – University Student Web Portal	23
4.1. Chapter Overview	23
4.2. WAMP Server.....	23
4.3. Joomla - CMS	24
4.4. SMS Gateway - Ozeki.....	28
4.5. Webcam Software - yawcam	29
4.6. Chapter Summary	29
Chapter 5 - Analysis and Design	30
5.1. Chapter Overview	30
5.2. Requirement Capturing and Verification.....	30
5.3. Content of the System	30
5.4. Menus	31
5.5. Template	31
5.6. Users of the System	32
5.7. Users Requirements	34
5.8. USSCP System Requirements	36
5.9. Functional Requirements.....	36
5.10. Non Functional Requirements.....	42
5.11. USSCP Front Side Interface.....	43
5.12. Chapter Summary	44
Chapter 6 - Implementation	45
6.1. Chapter Overview	45
6.2. USSCP Hardware Implementation.....	45
6.3. USSCP Software Requirements	46
6.4. Use Case Specifications.....	47
6.5. Chapter Summary	59

Chapter 7 – Evaluation	60
7.1. Chapter Overview	60
7.2. Statistical Survey	60
7.3. Selection of Participants	60
7.4. Design of Questionnaire	60
7.5. Sectional Evaluation.....	61
7.6. Sectional Evaluation Result.....	61
7.6.1. Interface section evaluation	62
7.6.2. Contents section evaluation	63
7.6.3. Functionalities section evaluation	64
7.7. Overall Evaluation Result.....	65
7.8. Chapter Summary	66
Chapter 8 – Conclusion and Further Work.....	67
8.1. Chapter Overview.....	67
8.2. Conclusion.....	67
8.3. Encountered Problems and Limitations	67
8.4. Further Works.....	69
Chapter 9 - References	70
Chapter 10 Appendixes A – USCCP Screenshots.....	71
Chapter 11 Appendixes B – Questionnaire	78
Chapter 12 - Appendixes C - Installation Guidance.....	80
