

**A FRAMEWORK FOR EFFECTIVE IMPLEMENTATION  
OF MANAGEMENT INFORMATION SYSTEMS IN THE  
RURAL DEVELOPMENT SECTOR**

Muhandiramge Don Amila Helanuwan

(099061)

This Dissertation Submitted in Fulfillment of the Requirement for the Master of Business  
Administration in Information Technology

Department of Computer Science and Engineering

University of Moratuwa

Sri Lanka

June 2011

## DECLARATION

I declare that this is my own work and this dissertation does not incorporate without acknowledgement any material previously submitted for the degree or diploma in any other University or Institute of higher learning and to the best of my knowledge and I believe it does not contain any material previously published, or written by another person except where the acknowledgements is made in the text.

Also, I hereby grant to University of Moratuwa the non exclusive right to reproduce and distribute my dissertation in whole or in part in print, electronic or other medium. I retain the right to use this content in whole or part in future works.

Date:

The above candidate has carried out research for the master's dissertation under my supervision

Signature  
Dr. Shantha Fernando

Date:

## **DEDICATION**

To my wife and children for their endless patience, benefaction and encouragement.

## **ACKNOWLEDGEMENT**

This dissertation is a result of the continuous effort of a research, during my second year of the MBA in IT. During this period I have been able to obtain numerous experiences to achieve the success. It is a great pleasure for me to offer my sincere gratitude to individuals who were involved and helped me in various ways.

Firstly, I would like to express my appreciation and sincere gratitude to my supervisor Dr. Shantha Fernando for his support and guidance from the beginning to the completion of this research.

I take this opportunity to thank Dr. Chandana Gamage, Co-ordinator of the MBA IT Program at the Department of Computer Science and Engineering for providing valuable advice at various stages, in this research hypothesis.

My deepest gratitude goes to Ms. S.T.C Gaveshika, Statistician of the Department of Census and Statistics for providing me the valuable guidance on statistical analysis to carry out this dissertation successfully.

I am very grateful to all Senior Officials, Chief Facilitators, Field level officers, Data entry operators; Office bearers of the Community level Organizations who provided their honest ideas, for the success of this research thus enabling me to complete this research.

And I would also like to thank Mr. K.C Lai (Monitoring & Evaluation Specialist) and Mr. Jim Hancock (Natural Resource & Livelihood Specialist) of the Investment Division of the Food and Agriculture Organization (FAO) World Bank Cooperative Program for updating me on new strategies of other countries, on the implementation of MIS.

Finally, in this venture, I am greatly indebted to all members of my family, to Mrs. J. Perera and Mr. D. Liyanage, for the encouragement given throughout the whole MBA Program.

## **ABSTRACT**

Information and Communication Technologies are increasingly used by developing countries in strategies that see the new technology as having the potential to deliver economic growth, employment, skills generation and empowerment. The Information communication technology advancement contributes to the improvement of information system literacy within the society.

A Management Information System has a greater contribution to increase competitiveness and effectiveness of managers in the decision making process and in solving different problems that emerge when managing an organization.

The aim of this thesis is to identify and analyze critical factors that may have an impact on an effective implementation of a Management Information System (MIS) that has been developed for many projects of the rural development sector in Sri Lanka. The information needs of the various managerial levels are pointed out and the stages in the development of MIS are defined. The growing importance, of the application of MIS in the rural development sector, is highlighted. The implementation of an MIS tool in order to improve the service quality among the staff is expected to provide an excellent facilitation to the community.

Firstly, preliminary data gathering was carried out by reviewing the available literature to identify critical factors, which highlighted when implementing information systems on various projects local and overseas. After conducting the interviews and the literature survey, a theoretical framework was designed, hypotheses were identified and an appropriate statistical method was selected.

Secondly, a research was conducted to obtain the views from the village community, field officers, management Consultants and senior officials who play a key role in the system implementation.

Thirdly, collected data were analyzed and recommendations were proposed together with a framework for effective implementation of management information systems in the rural development sector.

The main outcome of this thesis is a guideline or framework for development projects which planning to implement an MIS solution for their organizations. The analysis highlights the relationship between the four important factors (i.e.: Perception, Usability, Sustainability and Suitability) which could be seen as possible barriers to the successful introduction of MIS. Furthermore, these factors will be helpful to examine the sustainability of the system either during the project process or in connection with the usage in their practices.

**Key words:** Management Information System (MIS), Information Technology (IT), Rural Development (RD).

# TABLE OF CONTENTS

Declaration.....	i
Dedication.....	ii
Acknowledgement .....	iii
Abstract.....	iv
Table of Contents.....	v
List of Figures .....	vii
List of Tables .....	viii
List of Abbreviations .....	x
List of Annexure .....	xi
1. INTRODUCTION.....	1
1.1 Background of the Study.....	1
1.1.1 Initiatives on Rural Development.....	1
1.1.2 The need of MIS for Managerial Purposes.....	2
1.2 Objectives.....	3
1.3 Research Outcome.....	4
1.4 Problem Statement .....	4
1.5 Research Carried out.....	4
1.6 Observations and Significance of Study .....	6
1.7 Thesis Outline .....	7
2. LITERATURE REVIEW .....	8
2.1 Introduction.....	8
2.2 Defining the Terms.....	10
2.2.1 Rural development sector .....	10
2.2.2 Management Information System definitions.....	11
2.2.3 Characteristics of Management Information System.....	11
2.3 Rural Development Sector .....	12
2.3.1 Important facts regarding rural investments .....	12
2.3.2 Foreign funded projects in the rural development sector.....	13
2.3.3 Rural development projects in Sri Lanka.....	13
2.4 Information Systems in Organizations.....	19
2.4.1 Information systems.....	19
2.4.2 Functions of an information system.....	20
2.4.3 Information systems characteristics.....	21
2.4.4 Reasons for implementing MIS in an organization .....	22
2.4.5 Use of MIS in an Organization .....	22
2.4.6 Computer literacy and information system literacy.....	22
2.4.7 Management hierarchy in a firm or organization .....	23
2.4.8 IT and business strategy.....	24
2.5 Project Objectives and Relationship with MIS .....	24
2.5.1 Alignment of project objectives.....	24
2.5.2 Alignment with business process.....	24
2.5.3 Alignment with stakeholders and beneficiaries .....	25
2.6 Factors with MIS Development Process .....	26
2.6.1 Procurement .....	26
2.6.2 Software development life cycle.....	28

2.7	MIS Implementation and Long Term Sustainability.....	33
2.7.1	Decentralization of operations .....	34
2.7.2	Monitoring and continuous feedback.....	34
2.7.3	Capacity building.....	35
2.7.4	Trouble-shooting.....	35
2.7.5	Communication and knowledge skills:.....	35
2.7.6	Lessons learning and knowledge sharing .....	36
2.7.7	Challenges to information system implementation.....	36
2.8.1	External environment and the usability of MIS .....	37
2.8.1	Information technology infrastructure .....	37
2.8.2	Computer literacy / Education knowhow .....	37
2.8.3	Resource allocation (funds and staff) .....	38
2.8.4	Industry standards .....	38
2.8.5	People’s behavior.....	38
2.8.6	Government/ Political interests.....	39
2.9	Case Studies .....	39
2.9.1	Sujala Watershed Management project – Karnataka, India.....	39
2.9.2	Lifeline India, - One World South Asia.....	43
3.	RESEARCH METHODOLOGY .....	45
3.1	Introduction .....	45
3.2	Preliminary Data Gathering .....	45
3.3	Conceptual Model (Theoretical Framework).....	45
3.3	Hypothesis:.....	47
3.5	Management of Variables .....	48
3.6	Population and Sample.....	50
3.7	Method of Data Collection and Analysis .....	50
3.7.1	Reliability and validity of the variables.....	50
3.7.2	Chi – square test.....	51
4.	ANALYSIS AND DISCUSSION OF RESULTS.....	55
4.1	Characteristics of Survey.....	55
4.1.1	Distribution of questionnaire .....	55
4.1.2	External factors that influence the implementation of MIS.....	59
4.2	The Relationship between Project Objectives and People’s Perception of MIS.....	61
4.3	The Relationship between Project Development and Usability of MIS .....	64
4.4	The Relationship between Implementation of MIS and Sustainability.....	66
4.5	The Relationship between External Environment and Suitability of MIS.....	68
5.	RECOMMENDATIONS, CONCLUSION, AND FURTHER RESEARCH .....	72
5.1	Recommendations .....	72
5.1.1	A Framework for Effective Implementation of MIS .....	76
5.2	Conclusion.....	81
5.3	Further Research .....	82
	Reference .....	83
	Annexure A - Research Questionnaire for Village Organizations.....	86
	Annexure B - Research Questionnaire for Divisional Level Officers .....	96
	Annexure C - Research Questionnaire for the Management .....	103
