## **Appendix A**

# **Feasibility Study**

### **A.1 Economic Feasibility**

Cost of Resources needed for Development for Alarm monitoring system

When developing this system, the resources needed are;

Human Resources - 300 Man Hours Max. (4manhour/day x 5days/week x 15 weeks)

### **A.2 Technical Feasibility**

#### **A.2.1 Development Risk**

New ZTE BSS system is IBSC which is working with IP base signaling. When implementing IBSCs and their BTS sites. The alarms and Databases are different. In such a situation expected goals and schedules would not be achieved.

#### **A.2.2 Resource Availability**

##### **A.2.2.1 Hardware**

Currently for developing purpose personnel computers with necessary software are being purchased.

- Computer with Intel Pentium IV processor.
- 512 MB RAM or higher.
- 40 GB free hard drive space.
- CD driver or higher

For the deployment of the proposed system, the existing hardware and software (Figure A.1) at Hutchison telecom can be used straight away.

##### **A.2.2.2 Software**

Operating System	Windows XP Professional with SP2 or higher
Database	Ms SQL Server 2005
Developing Tool	VB.net
Icon/Logo	Adobe Photoshop
Documentation	Microsoft Word 2003 or higher

Figure A.1 – Software availability

##### **A.2.3 Technical know-how**

I am familiar with VB6 and Ms SQL and familiar with project management methods.

Need to follow VB.net for Ms SQL and to import data from Oracle to Ms SQL

Server.

### **A.3 Organizational Feasibility**

New System is one of the major needs for Hutch OMC. So The Organization must accept this system for cater with gradually increasing failures. There is no any risk for employees with their jobs other than reduce the burden of their daily maintenance work. So they will accept this system once introduced.

### **A.4 Legal Feasibility**

#### **A.4.1 License**

Hutchison telecom have obtained license for VB.net 2005, Oracle 9i and Ms SQL server 2005 from there vendors.

#### **A.4.2 Agreement**

Software maintenance and services will be provided under software licensing scheme. Yearly the client has to subscribe for the software and this subscription will cover minor system changes within the scope of the proposed system. Also the subscription will cover the consultation for user inquiries related to the system on operation. Software license subscription charges will be Rs. 50,000/= per year. First six months after installation of the system above mentioned services will be provided free of charge.

But any kind of major changes to the system or further enhancement of the system will not be covered under this agreement. Such requests will be considered case by case basis and will be charged based on the complexity of the system requested.

Also, the source codes of the system will not be given to the client under this agreement.

#### **A.4.3 Alternative Systems**

Distributed system can be used instead of common alarm client to access the database and manipulate the data. This distributed system has to be installed separately in each client computer.

### **A.5 Cost Benefit Analysis**

- Tangible Cost

#### Annual Cost

Annual license fee      Rs. 50,000.00

- Intangible Benefits

Time

Since existing process takes time to alarm querying, considerable amount of time is being wasted. Refreshing data and quick notification of the same done with new system can emerge real-time alarm monitoring system.

### **A.6 System Requirements**

The proposed system needs 1 additional Client computer to view the Alarms. And The Alarm client must be interconnected through local area network. The client already holds these requirements with existing Alarm macro system and hence there is no need to invest on purchasing computers and installing network system. Development of the system is done at no cost.

#### **A.6.1 Training**

Most of the users who are going to interact with this system have the basic computer knowledge and have knowledge of critical alarms.

Users of the system can be trained within a period of one week. Training is given with no cost.

University of Moratuwa, Sri Lanka.

#### **A.6.2 Reliability Requirement**

The system never fails due to power problems. Because Hutchison Alarm monitoring System located in their main Operation Center. The Generator automatically switch on when commercial power failures, if Generator failure they have battery bank with 48 hour duration capacity

#### **A.6.3 User Friendliness**

Standard color schemes, font types, font sizes should be used in the proposed system to increase the user friendliness. Standard interface designing models should be used in the system. This can avoid the user surprise from the system.

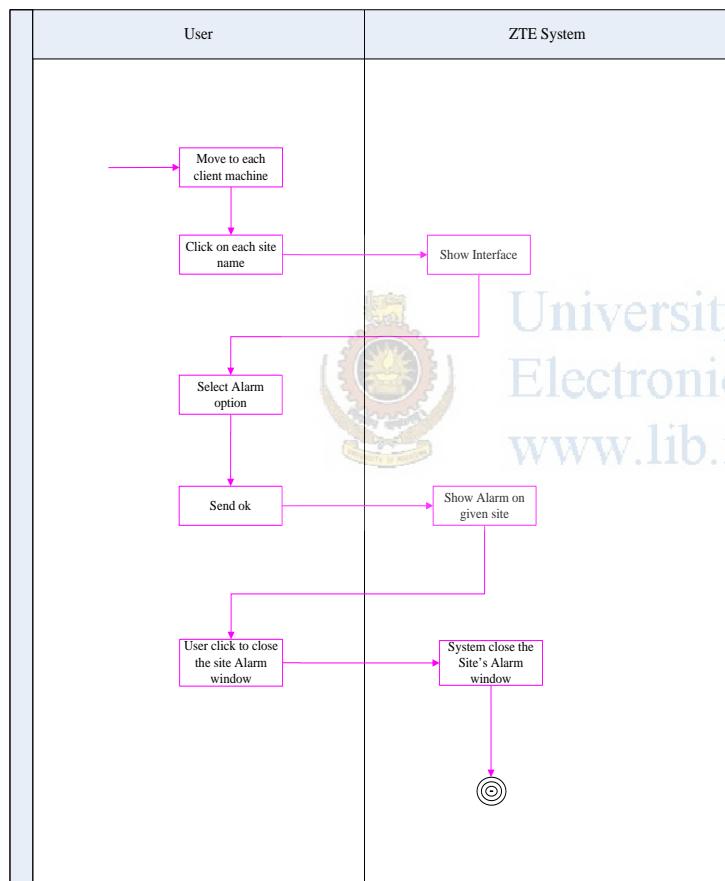

#### **A.6.4 Meaningful system messages**

System should present meaningful messages to user when prompting alerts, error or any instructions.

### Database Design

The figure displays four database tables:

- dbo.Alarm:** Columns: Column Name, Data Type, Allow Nulls. Rows: AlarmCode (int), AlarmName (varchar(50)), ColourID (varchar(50)), P\_ID (int).
- dbo.Colour:** Columns: Column Name, Data Type, Allow Nulls. Rows: ColourID (varchar(50)), RColour (int), GColour (int), BColour (int), RColourfont (int), GColourfont (int), BColourfont (int).
- dbo.CommissionedSite:** Columns: Column Name, Data Type, Allow Nulls. Rows: SiteID (uniqueidentifier, primary key), SiteName (varchar(50)), B\_BankDuration (numeric(18, 0)), AlarmHistory (varchar(50)), Status (bit).
- dbo.Priority:** Columns: Column Name, Data Type, Allow Nulls. Rows: P\_ID (int, primary key), Priority (varchar(50)).

### Interface Design

#### F.1 Show Alarms

The screenshot shows a software interface titled "HAM Alarm Monitor". The menu bar includes "Current Alarms", "History Alarms", and "Help". The main window displays a table of running alarms with the following columns: AlarmCode, Date\_Time, SiteName, Detail, Location, AlarmCode, Date\_Time, SiteName, Detail, and Location. The table contains 16 rows of alarm data. A "Close" button is located at the top right of the main window.

AlarmCode	Date_Time	SiteName	Detail	Location	AlarmCode	Date_Time	SiteName	Detail	Location
3861	9/17/2008 9:20 AM	Kakudara	Temperature Alarm	15_id45	3861	9/16/2008 8:09 AM	Kaduruvela	Temperature Alarm	12_id45

## F.2 Commissioned Site's Alarm History Maintenance

Figure F.2 – Commissioned Site's Alarm History Maintenance

Commissioned Site Alarm History Maintenance

Figure F.2 shows the “Commissioned Site’s Alarm History Maintenance” of the HAM System. It is include with Picture box with the Title bar at the top of the form. Right-bottom end of picture box is the Hutch Logo. Left side of the form is a list box which shows added records. Each selection of the list box is data query event and selected record from the database is shown on the right side text boxes of the form. Right-Bottom of the form there are buttons for Add records, Modify Record, Commissioned, Delete Record and Exit from the form window.

- When selecting the “Not Commissioned” button selected record is edited as Not Commissioned site and it will not shown on the “Commissioned Site’s Alarm History Maintenance” GUI anymore. It is shown on the “Not-Commissioned Maintenance” GUI only.
- Delete button position is slightly lower than other buttons to avoid deleting important records by mistakes
- The Top text box is for “SiteID” and it is Read-only Back colour is “Control”.
- Battery bank Duration is input box which accept only numeric values.

btnExit	Button	91	31	Lemon Chiffon	“Exit”	Times New Roman font size 12 Style Bold	Blue

Table F.4 – Standard Colours

#### F.5 - Search Alarms by Site Name/ by Alarm Code

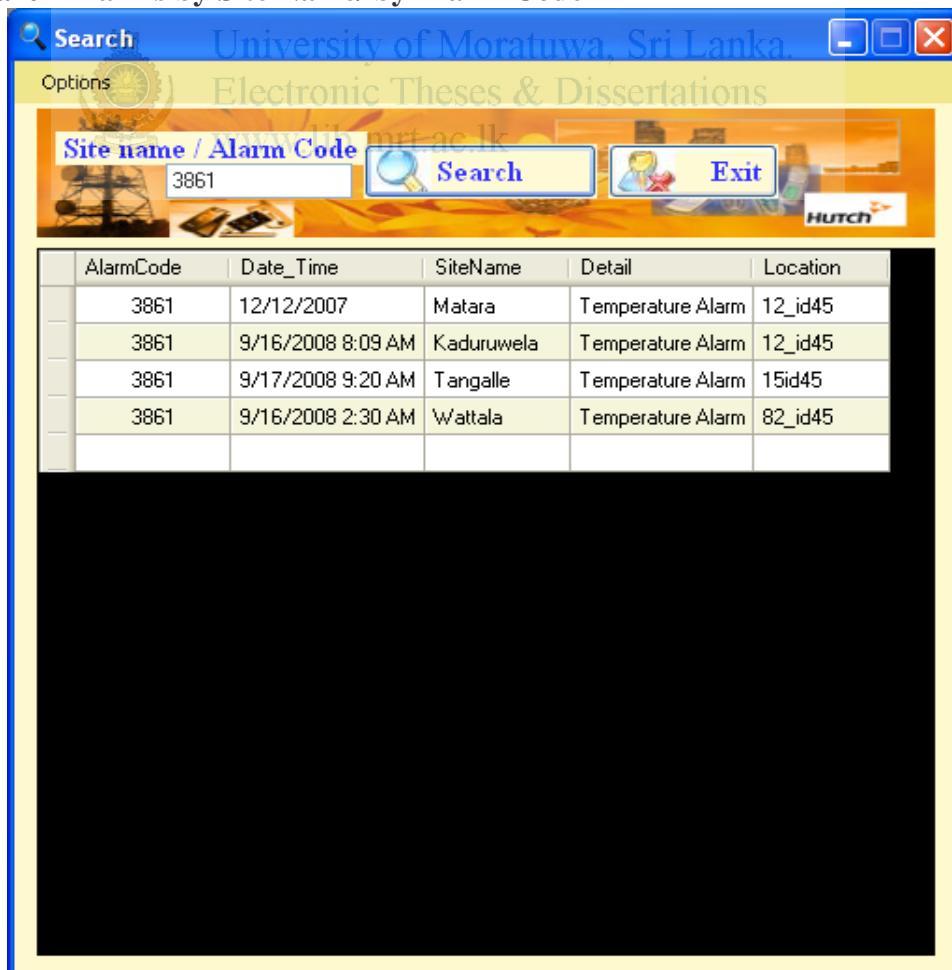

Figure F.5 - Search Alarms by Site Name/ by Alarm Code

Above figure shows the “Search” GUI of HAM System. It is including with Menu Strip, Input box which accept both “Alarm Code” and “Site Name”. AlarmGrid is shown selected Details of Records.

Control Name	Type	Width	Height	Back Colour	Text	Font	Font Colour
Search	Form	513	553	Lemon Chiffon	–	–	–
MenuStrip1	Menu Strip	481	24	Khaki	–	Tahoma font size 8.25	Black
TitlePictureBox	Picture Box	481	73	Logo1 Picture	–	–	–
AlarmGrid	Data Grid View	481	401	Black	–	MS Sans Serif font size 8.25	Black
LabelSearch	Label	167	19	Lemon Chiffon	Site name / Alarm Code	Times New Roman font size 12 Style Bold	Blue
btnSearchQuery	Button	125	31	Lemon Chiffon	“Search”	Times New Roman font size 11 Style Bold	Blue
BtnExit	Button	91	31	Lemon Chiffon	“Exit”	Times New Roman font size 12 Style Bold	Blue

Table F.5 - Search Alarms by Site Name/ by Alarm Code

## Appendix G

### G.1 Test Case – Alarm Maintenance - Insert

Test Case ID	3			
Tested Component	Add Alarm Code			
Tested Area	Functionality			
Purpose	User can Add new Alarm Codes			
Prerequisites	Alarm Code should not existing			
Test Data	Alarm Code = { valid, existing, string, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Input Alarm Code on Input box. Send “Add Alarm”.	Alarm Code: 3862 , Alarm Name: power failure alarm, Priority: Critical	Show added Records on list box.  Give message as "Alarm Code added successfully"	Pass
2	Input existing Alarm Code on Input box. Send “Add Alarm”.	Alarm Code: 3862 , Alarm Name: power failure alarm, Priority: Critical	Show Message box "Alarm Already exists"  Give message as " Alarm Code Insertion Failed"	Pass
3	Input string as Alarm Code on Input box. Send “Add Alarm”.	Alarm Code: 3862A , Alarm Name: power failure alarm, Priority: Critical	Give message as "Please Enter numeric value for the Alarm Code"	Pass
4	Add empty record. Send “Add Alarm”.	Alarm Code: Alarm Name: Priority:	Error message "Please Enter numeric value for the Alarm Code" should be displayed.	Pass

### G.2 Test Case – Alarm Maintenance - Modify

Test Case ID	4			
Tested Component	Modify Alarm Code			
Tested Area	Functionality			
Purpose	User can Modify selected Alarm Code			
Prerequisites	Alarm Code should existing			
Test Data	Alarm Code = { valid, new Alarm Code, string, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select the Alarm Code from the list box Edit Alarm Code	Alarm Code: 3862 , Alarm Name: AC power,	Show modified Records on list box  Give message as "Alarm Code modified"	Pass

	details on Input box. Send "Modify Alarm".	Priority: Major	<b>successfully"</b>	
2	Select the Alarm Code from the list box Edit new Alarm Code on Input box. Send "Modify Alarm".	Alarm Code: 3861 , Alarm Name: Temperature alarm, Priority: Minor	Show Message box "You can add the Alarm Code, instead of modify " Give message as "Alarm Code modification Failed"	Pass
3	Select the Alarm Code from the list box Edit string as Alarm Code on Input box. Send "Add Alarm".	Alarm Code: 3861A , Alarm Name: Temperature alarm, Priority: Minor	Give message as "Please Enter numeric value for the Alarm Code"	Pass
4	Select the Alarm Code from the list box Edit empty record. Send "Modify Alarm".	Alarm Code: Alarm Name: Priority:	Error message "Please Enter numeric value for the Alarm Code" should be displayed.	Pass

University of Moratuwa, Sri Lanka.

### G.3 Test Case – Alarm Maintenance - Delete & Dissertations

Test Case ID	5			
Tested Component	Delete Alarm Code			
Tested Area	Functionality			
Purpose	User can Delete Alarm Code			
Prerequisites	Alarm Code should existing			
Test Data	Alarm Code = { valid, invalid, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select the Alarm Code. from the list box Send "Delete Alarm".	Alarm Code: 3862 , Alarm Name: AC power , Priority: Major	Message Box show "Are you Sure, You want to Delete"	Pass
			Send Yes. Clear Records of list boxes Give message as "Alarm Code '3862' deleted successfully "	Pass
			Send No Give message as "Alarm Code deletion aborted".	Pass
2	Input invalid Alarm Code Send "Delete	Alarm Code: 3864 , Alarm Name:	Error message "'3864' not existing , Alarm Code deletion failed" should be displayed.	Pass

	Alarm".	AC power , Priority: Major		
3	Input empty Alarm Code Send "Delete Alarm".	Alarm Code: Alarm Name: Priority:	Error message "Please Enter numeric value for the Alarm Code" should be displayed.	Pass

#### G.4 Test Case – Standard Colours- Apply

Test Case ID	6			
Tested Component	Add/ Modify to Standard Alarm Codes			
Tested Area	Functionality			
Purpose	User can Add/Modify to Standard Alarm Codes			
Prerequisites				
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select "Alarm Codes with Standard Colours"	–	"Standard Colours" GUI should be given	Pass
	Send "Apply".	–	Message box "Are You sure, You want to modify"	Pass
			Send Yes. Give message "Alarm Code Modified Successfully" At "Alarm Maintenance" form, can see Standard Alarm Codes are Modified.	Pass
			Send No. Give message "Alarm Code Modification canceled"	Pass

#### G.5 Test Case – Not-Commissioned Site Maintenance -Select

Test Case ID	7			
Tested Component	Select Site Name			
Tested Area	Functionality			
Purpose	User can select Site Name and Its records are shown on input box for editing purpose.			
Prerequisites	Site Name stored as Not-commissioned Status="True"			
Test Data				
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select "Maintain Not-Commissioned Sites"	_	"Not-Commissioned Site Maintenance" GUI should be given	Pass
2	Select the Site Name from the list box	_	Search records of selected Site Name and display on relevant input box  Input Box: Site Name	Pass

#### G.6 Test Case – Not-Commissioned Site Maintenance - Insert

Test Case ID	8			
Tested Component	Add Record			
Tested Area	Functionality			
Purpose	User can Add new Site Names			
Prerequisites	Site Name should not existing in Commissioned or Not-Commissioned records			
Test Data	Site Name = { valid, existing, empty}			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Input Site Name on Input box. Send "Add Record".	Site Name: Borella	Show added Records on list box.  Give message as "Site Name added successfully"	Pass
2	Input existing Site Name on Input box. Send "Add Record".	Site Name: Borella	Show Message box "Site already exists in Not-Commissioned Table"  Or "Site already exists in Commissioned Table".  Give message as "Site Name addition Failed"	Pass
3	Add empty record. Send "Add Record".	Site Name:	Error message "Sorry! Required fields cannot be empty" should be displayed.	Pass

### G.7 Test Case – Not-Commissioned Site Maintenance - Modify

Test Case ID	9			
Tested Component	Modify Record			
Tested Area	Functionality			
Purpose	User can Modify selected Site Name			
Prerequisites	Site Name stored as Not-commissioned Status="True"			
Test Data	Site Name = { valid, existing, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select the Site Name from the list box. Edit Site Name on Input box. Send "Modify Record".	Site Name: Borella_2	Show Records add on list box. Give message as "Site Name modified successfully"	Pass
2	Select the Site Name from the list box. Edit existing Site Name on Input box. Send "Modify Record".	Site Name: Borella	Show Message box "Site already exists in Not-Commissioned Table" Or "Site already exists in Commissioned Table". Give message as "Site Name modification Failed"	Pass
3	Select the Site Name from the list box. Edit empty record. Send "Modify Record".	Site Name:	Error message "Sorry! Required fields cannot be empty" should be displayed.	Pass

### G.8 Test Case – Not-Commissioned Site Maintenance - Commissioned

Test Case ID	10			
Tested Component	Modify Record			
Tested Area	Functionality			
Purpose	User can Modify Not-Commissioned Sites as Commissioned			
Prerequisites	Site Name stored as Not-commissioned Status="True"			
Test Data	Site Name = { valid, existing, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select the Site Name from the list box. Send "Commissioned".	Site Name: Borella_2	Clear Record from list box. Give message as "Site added to Commissioned"	Pass
2	Edit existing Site Name on Input box. Send	Site Name: Borella_2	Show Message box "Site already exists in Not-Commissioned Table"	Pass

	“Commissioned”.		Or “Site already exists in Commissioned Table”. Give message as "Site Name modification Failed"	
3	Edit empty record. Send “Commissioned”.	Site Name:	Error message "Sorry! Required fields cannot be empty" should be displayed.	Pass

#### G.9 Test Case – Not-Commissioned Site Maintenance - Delete

Test Case ID	11			
Tested Component	Delete Record			
Tested Area	Functionality			
Purpose	User can Delete Not-Commissioned Sites			
Prerequisites	Site Name stored as Not-commissioned Status=“True”			
Test Data	Site Name = { valid, invalid, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select the site Name. Send “Delete Record”.	Site Name: Borella	Message Box show "Are you Sure, You want to Delete" Send Yes. Clear Record from list box Give message as "Site 'Borella' deleted successfully".	Pass
			Send No Give message as "Site Name deletion aborted".	Pass
2	Input not existing Site Name Send “Delete Record”.	Site Name: Matara_2	Error message "Site 'Matara_2' not existing" should be displayed.	Pass
3	Input empty Site Name Send “Delete Record”.	Site Name:	Error message "Sorry! Required fields cannot be empty" should be displayed.	Pass

#### G.10 Test Case – Commissioned Site’s Alarm History Maintenance-Select

Test Case ID	12			
Tested Component	Select Site Name			
Tested Area	Functionality			
Purpose	User can select Site Name and Its records are shown on input box for editing purpose.			
Prerequisites	Site Name stored as Not-commissioned Status=“False”			
Test Data				
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results

1	Select "Maintain Commissioned Site's Alarm History"	-	"Commissioned Site's Alarm History Maintenance" GUI should be given	Pass
2	Select the Site Name from the list box	-	Search records of selected Site Name and display on relevant input box  Input Box: Site Name Input Box: Battery Bank Duration Input Box: History Reason	Pass

#### G.11 Test Case – Commissioned Site's Alarm History Maintenance- Insert

Test Case ID	13			
Tested Component	Add Record			
Tested Area	Functionality			
Purpose	User can Add new Site Names			
Prerequisites	Site Name should not existing as Commissioned or Not-Commissioned records			
Test Data	Site Name = { valid, existing, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	 Input Site Name on Input box. Send "Add Record".	Site Name: Hantana, B. bank capacity: 24, History Reason: Microwave link failure due to mist.	If B. bank Duration is numeric Show added Records on list box. Give message as "Site Name added successfully"	Pass
			Else Give message as "Please Enter numeric value for the Duration"	Pass
2	Input existing Site Name on Input box. Send "Add Record".	Site Name: Hantana, B. bank capacity: 24, History Reason: Microwave link failure due to mist.	Show Message box "Site already exists in Not-Commissioned Table" Or "Site already exists in Commissioned Table". Give message as "Site Name addition Failed"	Pass
3	Add empty record. Send "Add Record".	Site Name: B. bank capacity: History Reason:	Error message "Sorry! Required fields cannot be empty" should be displayed.	Pass

### G.12 Test Case – Commissioned Site’s Alarm History Maintenance- Modify

Test Case ID	14			
Tested Component	Modify Record			
Tested Area	Functionality			
Purpose	User can Modify selected Site Name			
Prerequisites	Site Name stored as Not-commissioned Status=“False”			
Test Data	Site Name = { valid, existing, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select the Site Name. Edit Site Name on Input box. Send “Modify Record”.	Site Name: Hantana, B. bank capacity: 16, History Reason: Microwave link failure due to E1 errors.	If B. bank Duration is numeric Show added Records on list box. Give message as "Site Name modified successfully"  Else Give message as "Please Enter numeric value for the Duration"	Pass
2	Select the Site Name. Edit existing Site Name with same Battery bank capacity, History reason on Input boxes. Send “Modify Record”.	Site Name: Hantana, B. bank capacity: 16, History Reason: Microwave link failure due to E1 errors.	Show Message box "Site already exists in Not-Commissioned Table" Or "Site already exists in Commissioned Table". Give message as "Site Name modification Failed"	Pass
3	Select the Site Name. Edit empty record. Send “Modify Record”.	Site Name: B. bank capacity: History Reason:	Error message "Sorry! Required fields cannot be empty" should be displayed.	Pass

### G.13 Test Case -Commissioned Site’s Alarm History Maintenance-Not-Commissioned

Test Case ID	14			
Tested Component	Modify Record			
Tested Area	Functionality			
Purpose	User can Modify Commissioned Sites as Not-Commissioned			
Prerequisites	Site Name stored as Not-commissioned Status=“False”			
Test Data	Site Name = { valid, existing, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select the Site	Site Name:	Clear Record from list box.	Pass

	Name. Send “Commissioned”.	Hantana	Give message as "Site added to Not-Commissioned"	
2	Edit existing Site Name with same Battery bank capacity, History reason on Input boxes. Send “Commissioned”.	Site Name: Hantana	Show Message box "Site already exists in Not-Commissioned Table" Or "Site already exists in Commissioned Table". Give message as "Site Name modification Failed"	Pass
3	Edit empty record. Send “Commissioned”.	Site Name:	Error message "Sorry! Required fields cannot be empty" display.	Pass

#### G.14 Test Case – Commissioned Site’s Alarm History Maintenance - Delete

Test Case ID	16			
Tested Component	Delete Record			
Tested Area	Functionality			
Purpose	User can Delete Commissioned Sites			
Prerequisites	Site Name stored as Not-commissioned Status="False"			
Test Data	Site Name = { valid, invalid, empty }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Select the site Name. Send “Delete Record”.	Site Name: Wattala_2	Message Box show "Are you Sure, You want to Delete" Send Yes. Clear Record from list box Give message as "Site 'Wattala_2' deleted successfully".	Pass
			Send No Give message as "Site Name deletion aborted".	Pass
2	Input not existing Site Name Send “Delete Record”.	Site Name: Matara_2	Error message "Site 'Matara_2' not existing" should be displayed.	Pass
3	Input empty Site Name Send “Delete Record”.	Site Name:	Error message "Sorry! Required fields cannot be empty" display	Pass

### G.15 Test Case – Search by Site Name /by Alarm Code - Search

Test Case ID	17			
Tested Component	Search Records			
Tested Area	Functionality			
Purpose	User can search by Site Name or Alarm Code records			
Prerequisites	Site Name or Alarm Code should exist with records			
Test Data	Search = { Site Name, Alarm Code }			
Test Case Description				
No.	Test Case	Sample Data	Expected output	Results
1	Input existing Site Name. Send “Search”.	Search: Hantana	Alarm Grid display gives existing Site Name records.	Pass
2	Input existing Alarm Code. Send “Search”.	Search: 3861	Alarm Grid display gives existing Alarm Code records.	Pass
3	Input not existing record. Send “Search”.	Search:	Alarm Grid display is empty.	Pass

### G.16 Test Case – Search by Site Name /by Alarm Code - Print

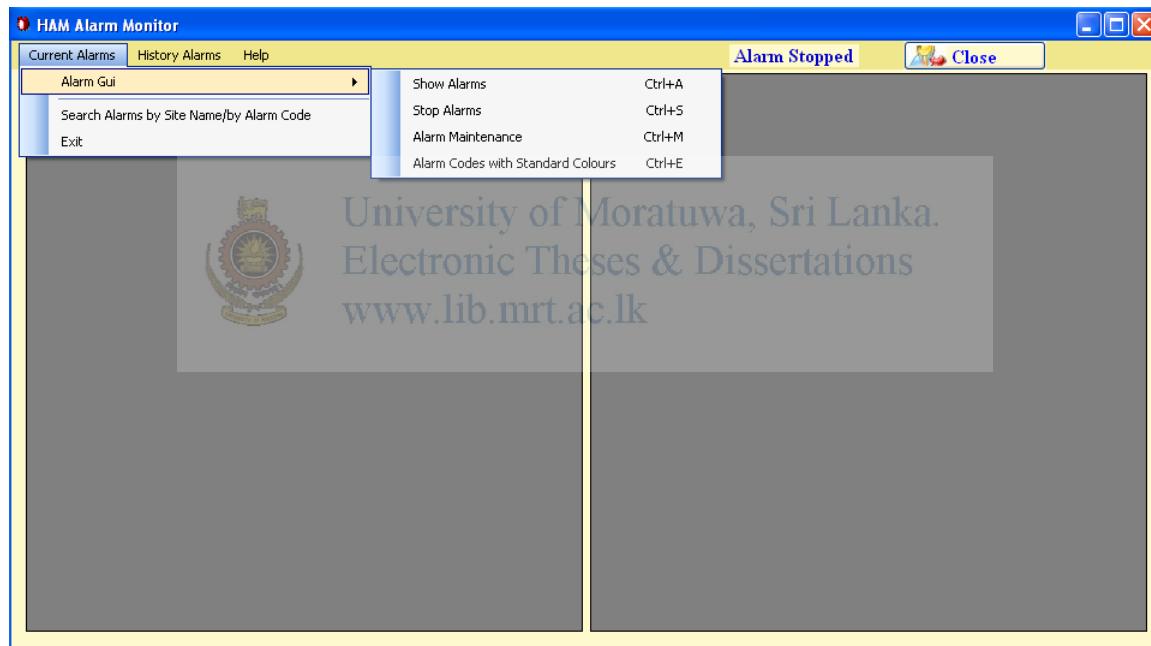

Test Case ID	18			
Tested Component	Print Record			
Tested Area	Functionality			
Purpose	User can print Site Name or Alarm Code records			
Prerequisites	Site Name or Alarm Code should exist with records			
Test Data				
No.	Test Case	Sample Data	Expected output	Results
1	Select “Print”. Send print button on print preview.	–	Alarm Grid display records show on print preview and then print.	Pass

## Appendix H

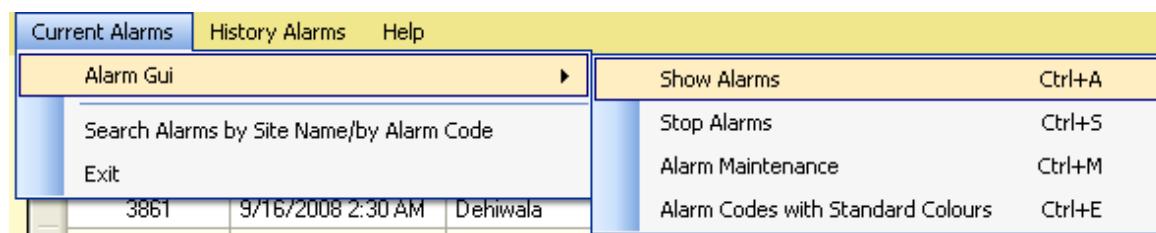

# User's Manual

### Product Features:

- **HAM Alarm Monitor for view current alarms**
- **Alarm maintenance interface for input and modify Alarm code colours**
- **Standard Colours interface for set standard colour settings**
- **Search interface for search and create reports with print option.**
- **Commissioned site's Alarm History Maintenance interface for input and modify alarm history details**
- **Not-Commissioned site Maintenance interface for input and modify not commissioned sites**

### H.0 Procedure:

- Select “Show Alarms” Ctrl+A from Current Alarms menu.

Current Alarms are shown on the Alarm monitor interface.

### Stop real-time monitoring:

- Select “Stop Alarms” Ctrl+S from Current Alarms menu.

 Electronic Theses & Dissertations  
H.1 System maintenance: [www.lib.mrt.ac.lk](http://www.lib.mrt.ac.lk)

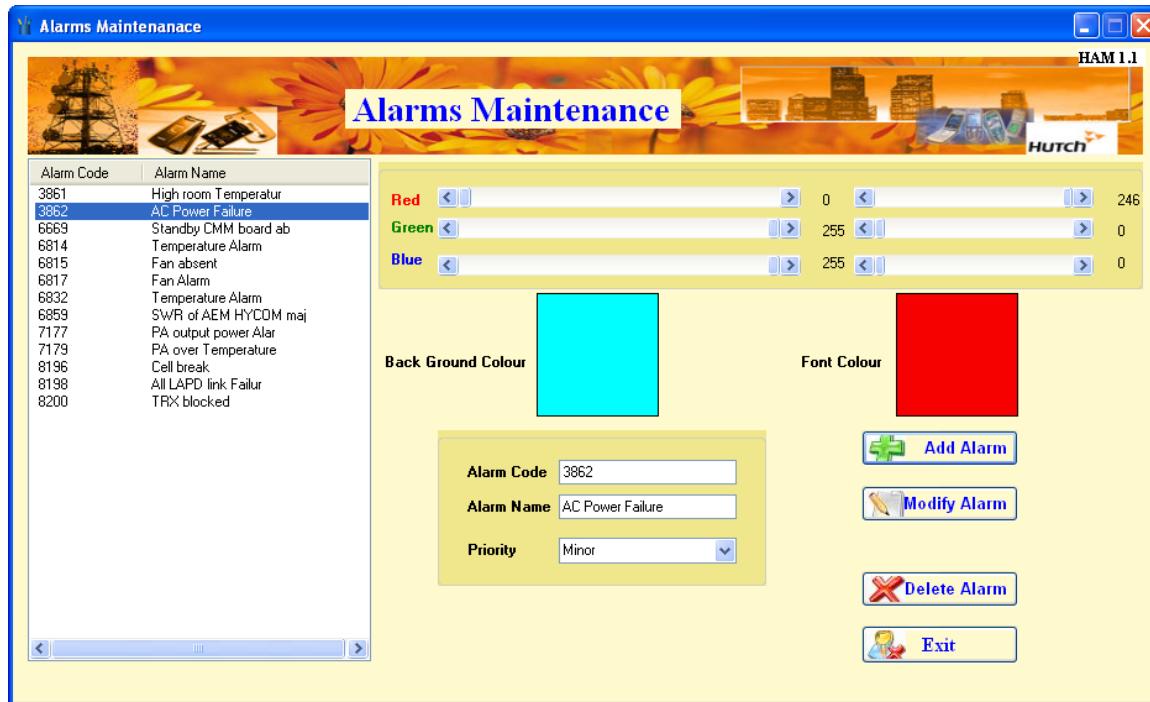

- Select “Alarm Maintenance” Ctrl+M from Current Alarms menu.

**HAM 1.1 – “Alarm Maintenance” will show.**

Add alarm code

- Add new alarm code on “Alarm Code” input box
- Add new alarm Name on “Alarm Name” input box
- Select Priority from “Priority” input box
- Select background and font colours from horizontal scroll bars for colour option
- Select “Add Alarm”

#### Modify alarm code

- Select alarm code from List box
- Modify alarm Name on “Alarm Name” input box
- Modify Priority from “Priority” input box
- Select background and font colours from horizontal scroll bars for colour option
- Select “Modify Alarm”

#### Delete alarm code

- Select alarm code from List box
- Select “Delete Alarm”

#### H.2 Set standard colours:

- Select “Alarm Codes with Standard Colours” Ctrl+E from Current Alarms menu.

#### HAM 1.2 - “Alarm Codes with Standard Colours” will show

HAM 1.2 – “Standard Colours” will show.

Apply

- Select “Apply” and then standard colours will appear on HAM Alarm monitor.

**H.3 Search and Reports Print:**  
Select “Search Alarms by Site Name/by Alarm Code” from Current Alarms menu

**HAM 1.3 - “Search Alarms by Site Name/by Alarm Code” will show**

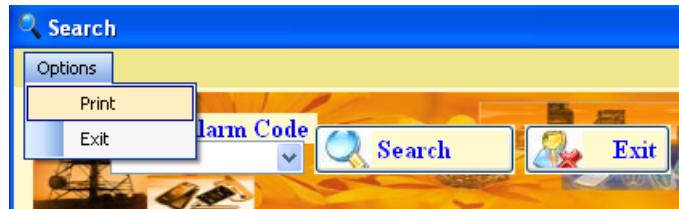

AlarmCode	Date_Time	SiteName	Detail	Location
3861	12/12/2007	Borella	Temperature Alarm	12_id45
3861	9/16/2008 8:09 AM	Mabole	Temperature Alarm	12_id45
3861	9/17/2008 9:20 AM	Kalutara	Temperature Alarm	15_id45
3861	9/16/2008 2:30 AM	Dehiwala	Temperature Alarm	82_id45
3861	12/12/2007	Matara	Temperature Alarm	12_id45
3861	9/16/2008 8:09 AM	Kaduruwela	Temperature Alarm	12_id45
