DECLARATION

I declare that this is my own work and this dissertation does not incorporate without acknowledgement any material previously submitted for Degree or Diploma in any other University or institute of higher learning and to the best of my knowledge and belief it does not contain any material previously published or written by another person except where the acknowledgement is made in the text.

Also, I hereby grant to University of Moratuwa the non-exclusive right to reproduce and distribute my dissertation, in whole or in part in print, electronic or other medium. I retain the right to use this content in whole or part in future works (such as articles or books).

Name: R.W.M.P.G.S Rajapaksha

ABSTRACT

As a result of the growth of social media sites and e-commerce websites, most of these websites provide platforms for people to express their opinion about their products or services. Main purpose of these platforms is to improve customer shopping experience. Moreover, these websites can use customer reviews to improve their products or services. In the sportswear apparel industry, almost all e-commerce websites provide these platforms for customers to leave their feedback. Since manual analysis of huge number of reviews is practically impossible, the automated approach of sentiment analysis/opinion mining has got the attention.

Sentiment analysis can be classified into 3 categories such as document-level sentiment analysis, sentence-level sentiment analysis and aspect-level sentiment analysis. Document-level or sentence-level sentiment analysis does not give the complete information as reviews consist with multiple entities and may have different opinions for different entities. This issue has inspired the aspect level opinion mining.

There are two core tasks involve with aspect level opinion mining. Those are aspect extraction and aspect sentiment analysis. This research aim at the first task of aspect level opinion mining which is aspect extraction task for sportswear apparel reviews as none of pervious works consider a clothing review dataset. A new data set will be produced with manual annotations by domain experts. This study used different deep learning models and achieved state-of-the-art performance for sportswear apparel reviews. It serves as the baseline for future research.

Keywords

Sentiment Analysis, Opinion Mining, Multi-label classification, Aspect Based Opinion Mining, Aspect Extraction, BERT, RoBERTa, Sentence Pair Classification, Multi-label classification.

ACKNOWLEDGEMENT

My sincere appreciation goes to my family for the continuous support and motivation given to make this thesis a success. I also express my heartfelt gratitude to Dr. Surangika Ranathunga, my supervisor, for the supervision and advice given throughout to make this research a success. I also thank Mr. Hansa Perera from MAS Holdings who provided the dataset for this research. Last but not least I also thank my friends who supported me in this whole effort.

DECLARATION	i
ABSTRACT.....	ii
ACKNOWLEDGEMENT	iii
Table of Contents	iv
List of Figures	viii
List of Tables	ix
CHAPTER 1 : INTRODUCTION	1
1.1 Background	1
1.2 Opinion Mining.....	2
1.3 Problem and Motivation.....	2
1.4 Objectives.....	3
1.5 Contribution	3
1.6 Report Organization	4
CHAPTER 2 : LITERATURE REVIEW	5
2.1 Opinion Mining.....	5
2.2 Opinion mining at different levels	6
2.2.1 Document-level opinion mining	6
2.2.2 Sentence-level opinion mining	6
2.2.3 Aspect-level opinion mining.....	6
2.3 Aspect Extraction	8
2.3.1 Unsupervised Methods	9

2.3.1.1 Frequency or Statistical.....	9
2.3.1.2 Bootstrapping (Unsupervised)	10
2.3.1.3 Heuristic or Rule-based.....	10
2.3.1.4 Topic Modeling.....	11
2.3.2 Semi -supervised Methods.....	12
2.3.2.1 Bootstrapping (Semi-supervised).....	12
2.3.2.2 Double propagation.....	12
2.3.2.3 Dependency parsing	13
2.3.2.4 Lexicon-based	14
2.3.2.5 Word alignment or graph-based.....	14
2.3.2.6 Statistical based.....	15
2.3.3 Supervised Methods.....	15
2.3.3.1 Hidden Markov Model (HMM) based	15
2.3.3.2 Conditional random field (CRF)	16
2.3.4 Deep Learning	17
2.3.4.1 Transformers.....	18
2.3.5 Implicit Aspects	21
2.3.5.1 Unsupervised Methods.....	21
2.3.5.2 Semi-Supervised Methods	21
2.3.5.3 Supervised Methods	22
2.3.6 Summary.....	23
2.4 Data Pre-Processing	23
2.5 Feature Selection.....	24
CHAPTER 3 : RESEARCH METHODOLOGY	27

3.1 Customer Reviews Data Collection	27
3.2 Product Aspects.....	28
3.3 Data Preprocessing.....	32
3.4 Data Annotation	33
3.5 Exploratory Data Analysis	34
3.6 Classification Algorithms	36
3.6.1 Convolution Neural Network (CNN)	36
3.6.2 BERT	37
3.6.3 RoBERTa.....	37
3.6.4 Ensemble Methods.....	38
3.7 Evaluation Metrics	38
CHAPTER 4 : SYSTEM EVALUATION.....	39
4.1 Inter-Annotator Agreement.....	39
4.2 Evaluation Results.....	40
4.3 Error Analysis	42
4.3.1 Fit	42
4.3.2 Size	42
4.3.3 Material.....	43
4.3.4 Comfortability.....	43
4.3.5 Quality	44
4.3.6 Price	44
4.3.7 Color	45
4.3.8 General.....	45
CHAPTER 5 : CONCLUSION.....	46

5.1 Future Improvements47
