ACKNOWLEDGEMENTS

I wish to express my thanks to Professor Lakdas D.Fernando, Head of the Department of Textile Technology of the University of Moratuwa, Sri Lanka, for invaluable assistance and advice.

My thanks are due to Mr Z.T.Bartnic, Knitting Adviser, UNIDO project, Textile Training and Services centre, Ministry of Textile Industries, Ratmalana, for his enlightening suggestions and encouraging me in this project.

I am very grateful to Mr Michael Lohs, Managing Director, Eskimo Fashion Knitwear (Lanka) Limited, for enlisting me as a trainee production executive in his company during my project work there and advices which was given to me.

My thanks are due to Mr Somadasa and his staff who assisted me in carrying out this project work at Eskimo Fashion Knitwear Limited.

My thanks are also due to Mr Nihal Rathnayake, Mr R.Shanmuganathan, Mr A.J.Kasim Ahamed, Mr S.A.Anbahan and Mr Basil Goonawardana who helped me to bring out my effort into book form.

My sincere thanks specially go to Dr M.P.U.Bandara, and other members of the staff of the Department of Textile Technology, University of Moratuwa, for helping me in this project.

A B S T R A C T

This study is mainly based on the performance of the operators who work in the double cylinder knitting department. By the help of method study and work measurement the following improvements have been achieved.

- Achievements
- 1) payment scheme to upgrade operator performance
 - 2) installation of new methods.
 - 3) cost reduction

This study was carried out under two limitations,

- 1) without changing machines to new machines.
- 2) under prevailing circumstances.

This project report would also serve for further study of the situations where group of operatives are working under restricted work.
