COMPOSTING OF
MUNICIPAL SOLID WASTE

by

T J WEERASINGHE

This thesis was submitted to the Department of Civil Engineering of the University of Moratuwa, Sri Lanka, as a partial fulfilment of the requirements of the degree of Master of Engineering in Environmental Engineering.

ACKNOWLEDGEMENT

The author wishes to express his appreciation to the Director of the Colombo University of Applied Sciences for his kind permission to use the facilities of the University for the purpose of carrying out the research.

This thesis has not been previously presented in whole or part to any University or Institute, for a higher degree.

The author also wishes to thank the Director of the Department of Applied Sciences, Colombo University of Applied Sciences, for his kind permission to use the facilities of the Department for the purpose of carrying out the research.

The author wishes to express his appreciation to the Director of the Colombo University of Applied Sciences for his kind permission to use the facilities of the University for the purpose of carrying out the research.

ACKNOWLEDGEMENT

The Solid Waste Management Division of the Colombo Municipal Council assisted me in many ways to implement this research project. It provided all the necessary equipment, labour and the site, required for the project. Civil Engineering Department of the University of Moratuwa, too, helped me in this project. It met the cost of all the tests done and the labour engaged to carry out various activities of the research work, with the financial assistance provided by the World Health Organization.

I am grateful to the Colombo Municipal Council, University of Moratuwa and the World Health Organization, for the assistance extended to me.

Mrs. N Ratnayake, Senior Lecturer of the University of Moratuwa, and the supervisor of this research study, advised and guided me at every stage of the project, to complete it successfully. I sincerely thank her.

C O N T E N T S

Summary	i
1. Introduction	1
1.1 Back ground	1
1.2 Quantity of solid waste	5
1.3 Quality of solid waste	6
1.4 Scope of the project	7
2. Survey on Compost Producers	9
2.1 Compost produced by Hiat Agro Ltd.	9
2.2 Compost produced for the Department of Agrarian Services	11
2.3 Compost produced by Water Resources Board	13
3. Literature Survey	21
3.1 General	21
3.2 Aerobic decomposition	21
3.3 Anaerobic fermentation	22
3.4 Fundamentals	23
3.5 Compost depots	44
3.6 Volume reduction	45
4. Pilot Project	48
4.1 Objective and scope	48
4.2 Methodology	50
4.3 Experimental procedure	50
5. Analysis of results	83
5.1 Compostability of solid waste	83
5.2 C:N ratio in municipal solid waste	83
5.3 Temperature	84
5.4 Moisture content	85
5.5 N.P.K.Values	86
5.6 Shrinkage in volume	87
5.7 Fly control	88
6. Discussion	89
6.1 General	89
6.2 Compost yard	89
6.3 Segregation	90
6.4 Shredding	90
6.5 Placement of material	91
6.6 C:N ratio	92
6.7 Temperature and Aeration	92
6.8 Moisture content	93
6.9 Quality of compost	94
6.10 Shrinkage in volume	94
6.11 Fly control	95
7. Conclusion and Recommendations for further studies	96
7.1 Conclusion	96
7.2 Recommendations for further studies	97
8. References	98

Appendices

- 1 Report on analysis for C:N ratio - Pile 1
- 2 - Do - - Pile 4 & 5
- 3 - Do - - Pile 6
- 4 - Do - - Pile 7
- 5 Report on analysis of compost for N:P:K values
- 6 Literature on the test to determine carbon
- 7 Literature on the test to determine nitrogen
- 8 Advisory circular No.A4 of the Coconut
Research Institute, Sri Lanka.
